

Pravin Gadekar

Senior Google Cloud Solution Architect — Data & GenAI

pbgadekar@gmail.com | Mumbai, India | Open to relocation | [linkedin.com/in/pravin-gadekar](https://www.linkedin.com/in/pravin-gadekar)

PROFESSIONAL PROFILE / CAREER SUMMARY

Cloud Data Architect — Google Cloud, Snowflake, Azure • 16+ years

- **16+ years across data platforms and applications**, including 8+ years architecting on Google Cloud, Snowflake, and Azure for global enterprise clients.
- **Hands-on presales track record** — led 14 RFI/RFP responses for enterprise clients (Ericsson, John Lewis Partnership UK, IKEA), authoring solution architecture deliverables and presenting to client executives and technology leadership.
- **Currently driving 7 enterprise GenAI initiatives** end-to-end on Google Cloud using Gemini agents, multi-agent orchestration, Model Context Protocol (MCP), and Retrieval-Augmented Generation (RAG) on a Cloud Run + Firebase stack.
- **Proven outcomes** — US\$3M+/year savings on legacy DWH modernisation, 200+ production pipelines, enablement of 50+ engineers, and an active GCP & Data community on LinkedIn (7,000+ followers).

AREA OF EXPERTISE

Cloud • Data Engineering • GenAI • Solution Architecture

- **Google Cloud Data Stack:** BigQuery, Dataflow, Cloud Composer (Airflow), Cloud Run, Cloud Functions, Pub/Sub, Cloud Storage, Cloud SQL, Vertex AI, Looker, Dataform
- **GenAI on GCP:** Gemini, Vertex AI agents, multi-agent orchestration, Model Context Protocol (MCP), Retrieval-Augmented Generation (RAG), Cloud Run + Firebase deployment patterns
- **DataOps & Orchestration:** Apache Airflow, dbt, Google Dataform, Great Expectations, soda-core, Terraform, GitLab CI, GitHub Actions
- **Data Engineering:** Dimensional & data-vault modelling, ELT/CDC patterns, bronze/silver/gold layered architecture, Python, SQL, PL/SQL
- **Solution Architecture & Presales:** RFI/RFP response leadership, solution scoping, effort estimation, technical proposal authoring, executive client presentations
- **Multi-Cloud & Big Data:** Azure (Databricks, Synapse, ADF, ADLS Gen2), Snowflake, Hadoop migration, Spark, Power BI
- **DevOps & Containers:** Terraform IaC, CI/CD pipelines, Docker, Kubernetes (CKAD certified), GKE

PROFESSIONAL EXPERIENCE

LTI Mindtree

Jul 2024 – Present

Associate Principal — Cloud Data Architect

- **GenAI solution portfolio (GCP):** Architecting and delivering 7 enterprise GenAI initiatives end-to-end on Google Cloud — Gemini-based agents with multi-agent orchestration, Model Context Protocol (MCP) integrations, and Retrieval-Augmented Generation (RAG) over enterprise knowledge sources; deployed on a Cloud Run + Firebase stack with Vertex AI for model serving and observability.

- **M&R Conversational Analytics:** Designed backend data services and a Vertex AI + Looker integration to power conversational analytics over enterprise datasets, enabling natural-language access to BI for non-technical stakeholders.
- **SharePoint → BigQuery ingestion (serverless):** Architected hourly scheduled ingestion via the SharePoint API on Cloud Run containers; processed hundreds of files/day across dozens of BigQuery tables, eliminating ~15 FTE hours/month and improving Looker dashboard freshness.
- **Airflow → Dataform migration:** Migrated critical Cloud Composer DAGs to Google Dataform to standardise SQL transformations and simplify development; delivered ~US\$6K/month cost reduction and lowered MTTR through declarative pipelines and repository conventions.
- Established Dataform & Cloud Run conventions — repo layout, code ownership, automated testing, and Cloud Monitoring/Logging observability — with GitHub Actions CI/CD for reliable, repeatable releases.

Capgemini

Jul 2020 – Jul 2024

Cloud Architect

- **Enterprise data warehouse modernisation (UK):** Led replacement of legacy DB2/Teradata with Google Cloud (BigQuery, Dataflow, GCS) + Snowflake using a layered architecture (landing/bronze → curated/silver → marts/gold) with dimensional & data-vault modelling and CDC patterns; delivered ~US\$3M/year savings in licensing and infrastructure costs and accelerated time-to-insight.
- **Presales & RFI/RFP leadership:** Led 14 RFI/RFP responses for enterprise prospects including Ericsson, John Lewis Partnership (UK), and IKEA — owning solution architecture authoring, response coordination across SMEs, and executive-level presentation of cloud data platform proposals to client business and technology leadership.
- **Airflow + dbt estate at scale:** Designed and maintained 200+ Airflow/dbt workflows integrating 50+ data sources into Snowflake and BigQuery; built custom Airflow operators and plugins to standardise patterns and reduce boilerplate. Optimised dbt incremental models and selective tests to shorten build times and reduce compute costs.
- **IaC & CI/CD:** Implemented Terraform-managed infrastructure with GitLab CI gated promotions for environment consistency and safe, automated releases across dev/test/prod.
- **Data quality automation:** Set up automated data-quality pipelines using Great Expectations, dbt tests, soda-core, and custom scripts to validate integrity and detect anomalies across the data estate.
- **Azure analytics delivery:** Delivered batch ingestion from ADLS Gen2 → Delta Lake using Databricks Jobs + COPY INTO, curating bronze/silver/gold datasets for Synapse/Power BI analytics.
- **Internal enablement:** Trained 50+ junior engineers on Google Cloud and Snowflake best practices through structured enablement programmes.

L&T Infotech

Dec 2013 – Jul 2020

Senior Data Engineer

- **Hadoop → Azure migration:** Migrated on-prem Hadoop workloads to Azure using ADF + Azure Databricks + Synapse patterns, establishing landing/curated zones and ELT models; improved pipeline runtimes and lowered operating overhead while enabling scale-out

analytics.

- Built a vendor management application from scratch for Scandinavia's largest card processor using Sybase ASE and PowerBuilder.
- Implemented real-time processing of credit card transaction data feeding machine learning pipelines for fraud detection.

Hexaware Technologies Ltd.

Feb 2011 – Dec 2013

Software Engineer

- Developed trading applications with Sybase PowerBuilder and Sybase ASE enabling a US asset management firm to trade on European markets.
- Designed a PL/SQL code instrumentation system for Oracle database packages with minimal performance overhead.

3i Infotech Ltd.

Aug 2009 – Feb 2011

Consultant

- Developed asset-liability management applications for banks and financial institutions (Union Bank of India, Corporation Bank, Access Bank PLC Nigeria) using Sybase PowerBuilder and Oracle.

EDUCATION

MBA, Finance

ICFAI University

B.A., Economics

Mumbai University

ACHIEVEMENTS

1. **Outstanding Performance Award** (Feb 2016) — L&T Infotech
2. **Ace of the Month** (Jun 2013) — Hexaware Technologies
3. **7,000+ followers on LinkedIn** — active GCP, Data, and GenAI community contributor; client-facing presenter across 14 RFI/RFP engagements; mentor to 50+ junior engineers.

CERTIFICATIONS

1. **Google Cloud** — Professional Cloud Architect · Professional Data Engineer · Associate Cloud Engineer
2. **Microsoft Certified** — Azure Data Engineer Associate
3. **Databricks Certified** — Data Engineer Associate · Data Analyst Associate
4. **CKAD** — Certified Kubernetes Application Developer
